

A LOCAL-FIRST DESIGN STUDIO

Folio

Describe it in plain words — and watch it
become a finished design.

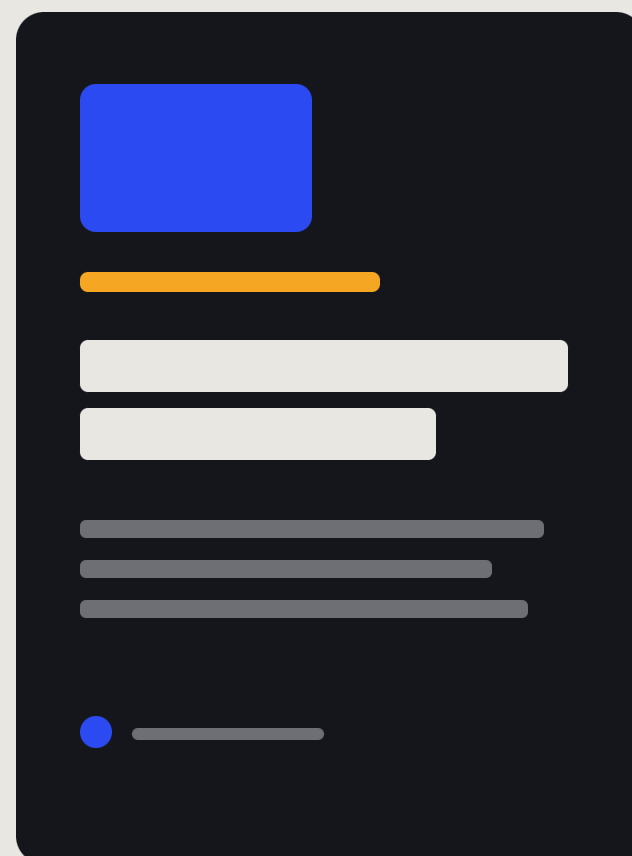

SWIPE →

You describe it. Folio designs it.

Tell it what you want — the way you'd tell a person. It chooses the type, colour, spacing and balance, and hands you back a finished, considered design.

YOU SAY

“Make a bold poster for our
summer rooftop party.”

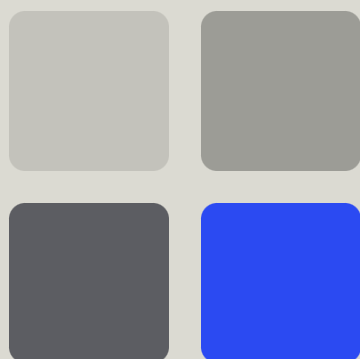

A FINISHED DESIGN

It designs like a person — not a template.

One confident accent. A clear order of importance. Room to breathe — the judgement a good designer brings to every single piece.

ONE ACCENT

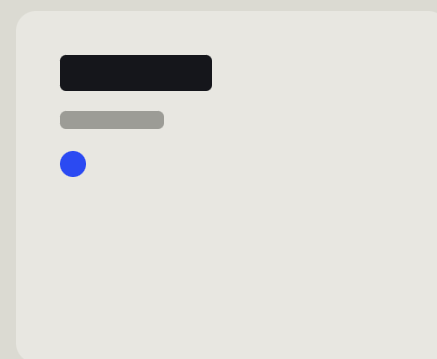

One colour does the talking. The rest keep quiet.

A CLEAR ORDER

One thing leads. The rest follow in order.

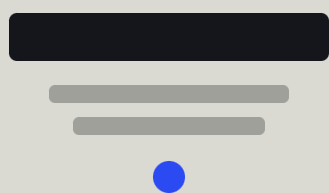

ROOM TO BREATHE

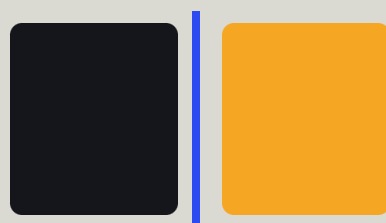

Space is part of the design.

The right shape for every idea.

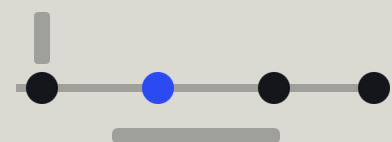

An event, a comparison, a timeline, a list, a story by the numbers — Folio knows the structure each one needs, and builds it to fit.

BY THE NUMBERS

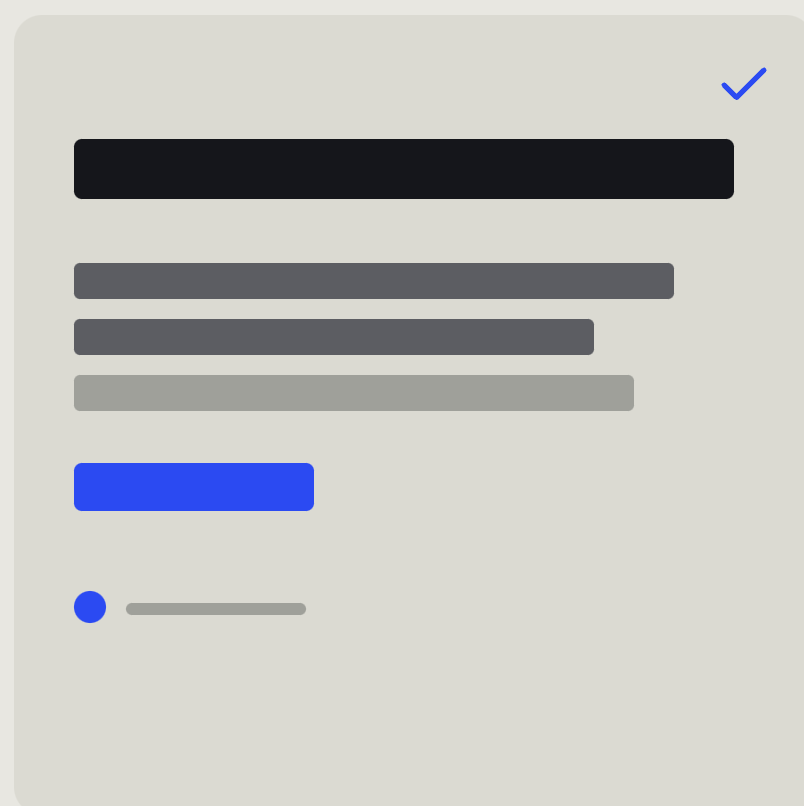

EDITORIAL

Every detail, taken care of.

Nothing overlaps. Nothing runs off the edge. Text stays readable on any background — the polish that usually eats your evening, done for you automatically.

LEFT TO CHANCE

HANDLED BY FOLIO

Yours to keep, edit, and share.

Every design is a real piece you own. Fine-tune anything by hand in the visual studio — then send it out wherever it needs to go.

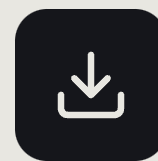

It's yours

A real piece that lives with you — not locked inside someone else's cloud.

Tweak by hand

Open the visual studio and nudge type, colour or spacing until it feels just right.

Send anywhere

Export a sharp image, a slide deck, or a print-ready file in a single click.

No accounts. No lock-in — just your designs, on your terms.

YOUR TURN

Start with a sentence.

Your next poster, deck or story is just one plain-English description away.

Describe your first design →

So — what would you make first?
